

INVENTORY OF HAZARDOUS MATERIALS

Compliant to Current & Future Regulations

WHY IHM?

The IHM requirements aim to promote the safe & environmentally friendly recycling of ships, which includes the identification, tracking and control of hazardous material on board.

WHY VEDAM?

- Experienced & Certified Team
- Highest Quality Standards
- Cost-Effective Services
- Time-Saving Solutions
- World Wide Availability
- Consistently Good Reputation
- Innovation In Every Step
- Reliability & Security

INVENTORY OF HAZARDOUS MATERIALS

Compliant to Current & Future Regulations

IHM Manual, Survey, Sampling & Testing

Collection of required information & documents

Preparation of visual ship check plan

On-board survey, collection of samples & submission to lab

Analysis of samples

Preparation of IHM report based on lab results

Verification survey carried out by Class and issuance of SOC/IC IHM

IHM Maintenance

As per authority requirements, inventory of all hazardous materials need to be maintained.

Without delay, Shipowners are advised to establish and implement IHM maintenance procedures. Failing to do so might result in findings during EU port state controls inspections.

Maintenance Manual Based On Vedam's In-house Software

- Well designed software
- Trained hazmat personnel for data collection
- Secured cloud platform for data management
- Smooth monitoring of project status
- Tracking sheet generated for PO, MD, & SDoC
- Auto generation of reports
- Suppliers training for MD & SDoC
