ABOUT VEDAM

Vedam is a new-age engineering company dedicated to providing innovative design and technological solutions for global maritime companies. With highly qualified 200+ team members and 35+ engineering software, Vedam develops future-ready design and software that drives industry growth and benefits the planet.

DESIGN SERVICES

- Ship Design • Production Design • Conversion & Retrofit • Decarbonization Studies • Site Supervision
- Engineering Analysis (FEM CFD, Mooring, Hydrodynamics) • LNG - FSRU Projects • Dredgers
- Marine Services (3DLS, IHM, D2 Sampling, UTM, Surveys)

DIGITAL SOLUTIONS

Measure, monitor and control emissions

App for onsite / remote inspection

VR based ship visualization & document management

Simplifying crew rest hour management
